

Traffic Regulation Order 7: London Road

Statement of Reasons

At Council on 15 October 2024, a summary of issues relating to certain Traffic Regulation Orders (TROs) was reported (report available [here](#)) and a rectification process agreed (report available [here](#)). TROs underpin the restrictions that we can apply to adopted Highway land, including those related to parking, bus lane and no-entry restrictions.

The agreed rectification process involves consulting on some new, permanent TROs, and amendments to other TROs, to address the issues identified.

The restrictions proposed in this consultation relate to the parking restrictions on London Road, including those related to resident permit parking restrictions.

Through the enforcement action that they will enable, the restrictions proposed in this consultation are expected to achieve the following:

- Parking / loading / stopping to be contained within marked bays;
- That parking is prioritised for local residents;
- That traffic flow is improved
- That risks associated with inappropriate parking and stopping are reduced, including risks associated with parking on the footway, reduced visibility at junctions and to vulnerable road users such as cyclists and motorcyclists

Having considered the duty imposed by Section 122(1) of the Road Traffic Regulation Act 1984 and having regard to the matters specified in Section 122(2) of Act, Reading Borough considers it necessary and expedient to make this order:

- For avoiding danger to persons or other traffic using the road or any other road or for preventing the likelihood of any such danger arising; and
- For preventing the use of the road by vehicular traffic of a kind which, or its use by vehicular traffic in a manner which, is unsuitable having regard to the existing character of the road or adjoining property.

As previously stated in press releases, any existing signs related to the restrictions proposed in this consultation are not currently being enforced. The outcome of this consultation will be the sole determining factor in deciding whether these signs are retained or removed. The presence of current signage does not imply any predetermined outcome and all responses will be considered impartially to ensure a fair and unbiased decision making process.

In accordance with the current Freedom of Information legislation, the Council may publish and/or disclose the entire content of any correspondence (including letter, forms or emails) sent in response to this Notice and such responses may be subject to public scrutiny.
